Preface

- Magento2 Mageants ImageGallery module allows the admin to add/manage images And videos according to their requirement
- Admin can easily manage photo gallery , videos gallery and gallery categories on their site.
- It will gives easy uploading of Images & videos and admin can easily manage their categories.
- The Module allows you to create multiple image & videos galleries.

Installation:

There are two ways of installing extension in magento2.

- 1) Using COMMAND LINE.
- 2) Manually install extension.

Option 1: Magento 2 install extension using COMMAND LINE (Recommended).

Follow below steps to install extension from the command line.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory.
If code directory does not exists then create.

Step 3: Disable the cache under System → Cache Management.

Step 4: Enter the following at the command line:
`php bin/magento setup:upgrade`
`php bin/magento setup:static-content:deploy`

Step 5: Once you complete above steps log out and log in back to the admin panel and switch to Stores → Configuration → Mageants → Image gallery.
The module will be displayed in the admin panel.

Option 2: Magento 2 install extension manually.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory.
If code directory does not exists then create.

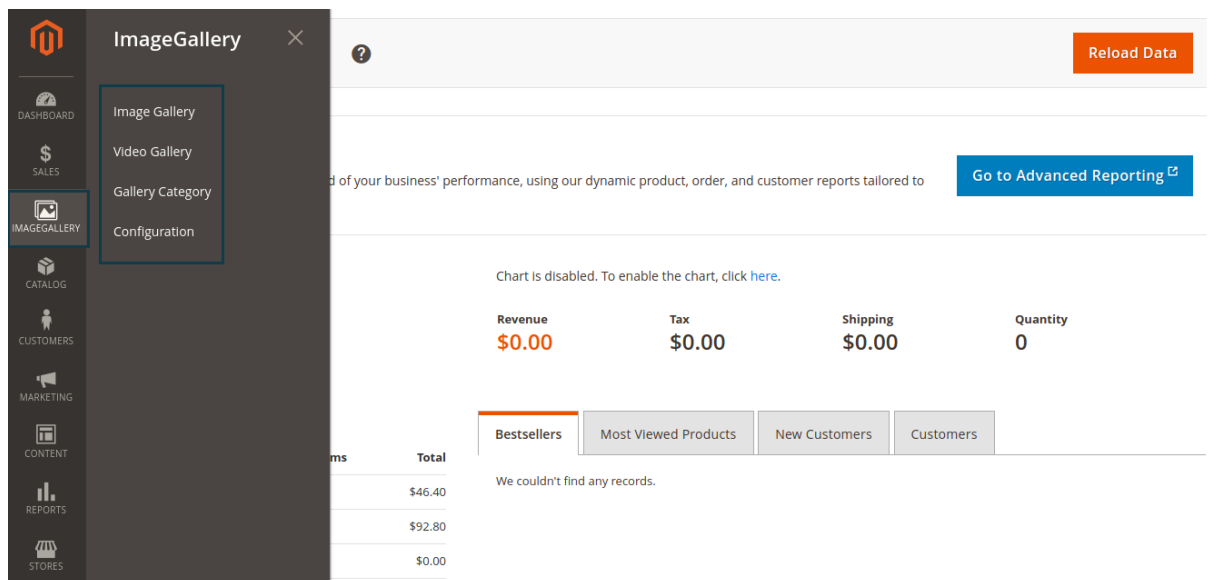

Step 3: Disable the cache under System → Cache Management Edit
app/etc/config.php file and add one line code: 'Mageants_Image gallery'
→ 1

Step 4: Disable the cache under System → Cache Management

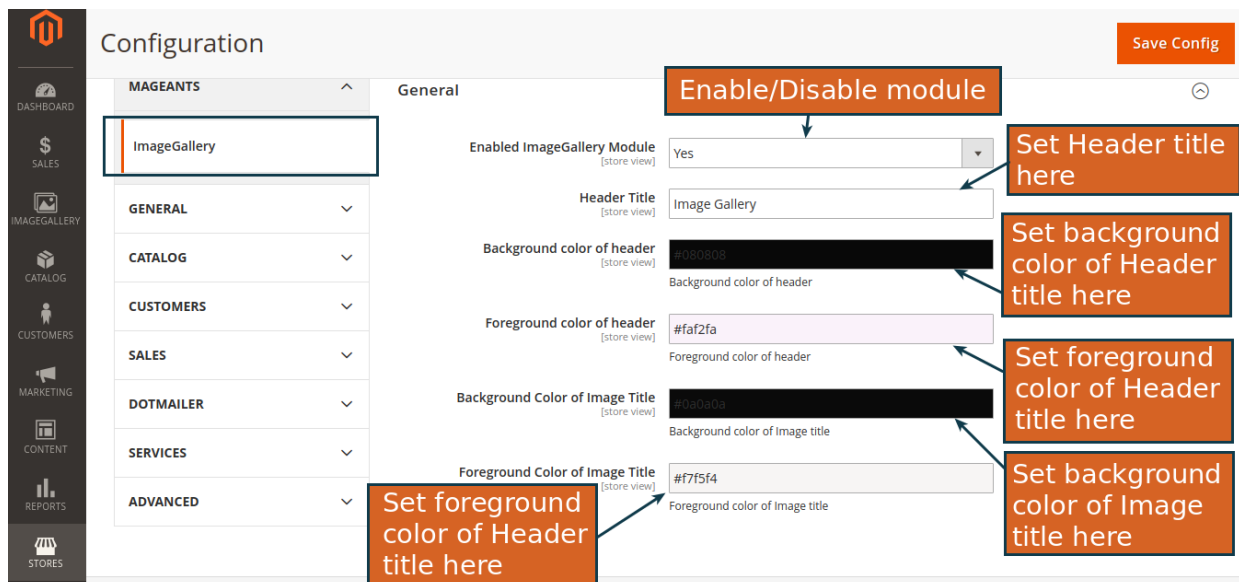

Step 5: Once you complete above steps log out and log in back to the
admin panel and switch to Stores → Configuration → Mageants →
Image gallery, the module will be displayed in the admin panel.
